

Did You Know...

...About Our Lady of the Lake School's Forensics (Public Speaking) Program?

Forensics, coined by Aristotle as “the art of reason,” refers to competition in speech, debate and dramatic events. It is ranked as the number one communication activity for the growth and development of critical thinking skills. Through interscholastic competition, forensics provides our students the opportunity to use their speaking, analytical, and critical thinking skills. Our team competes in regional tournaments and has consistently excelled in the categories of Dramatic Reading, Declamation, Dramatic Interpretation, and Humor. Lasting benefits of forensics include:

- Improves public speaking skills
- Excellent preparation for collegiate and professional careers
- Helps hone students critical, reflective and creative thinking capacities

Our philosophy is that whether a student chooses to compete or just practice, this skill will stay with them for the rest of their lives.
